Senior Full Stack Developer and Solutions Architect with 2.5 years of experience in building applications and open source projects using several languages and JavaScript frameworks, managing and optimizing backend infrastructure including deployment, scalability, performance and 3rd party service integrations.

## EXPERIENCE

### Tekie

Senior Full Stack Developer

Full Stack Developer

Frontend Developer Intern

Remote

June 2022 – Present

June 2021 – June 2022

Feb 2021 – June 2021

- Built user facing modules for MVP product, a Progressive Web App based on **Reactjs** and **Redux** and a Desktop Application using **Electron.js**
- Developed, Managed and Optimized API's and backend architecture for enhanced scalability and performance utilizing **Nodejs**, **GraphQL** and **Redis** Caching.
- Developed and Managed Internal Reporting and tooling architecture for Business Team utilizing Node, **ETL Map Reduce Process** (From MongoDB to SQL), **PostgreSQL** and **Python** (Flask)
- Integration of different 3rd party services such as **GSuit**, **Newrelic**, **Sentry**, **Elastic Search**, **Stellate** (GraphQL Caching) and **GA/GTM** to improve and monitor application performance.
- Managed and Optimized deployment infrastructure and Configured CI/CD on Github/Jenkins based of **Kubernetes**, **Redis**, **MongoDB**, **PostgreSQL**, **Azure** Services and **AWS** Services such as EC2, EKS, ECR, S3, Elastic Transcoder and CloudFront.
- Developed and Contributed to open-source NPM libraries for platform, **mongodb-aggregation-builder**, **tekie-content-editor**, **tekie-blockly**. Developed and Led many **Proof of Concept's** for Product Development.
- Interacting and engaging in discussions with stakeholders from various departments to determine and deliver optimal tech solutions aligned with business requirements.
- Mentored, Guided and led a team of 7 in spearheading the product development and seamless migration of an product suite. Encouraged code hygiene and best practices while building along with peer code reviews.

### InVideo

Front-end Developer Intern

Mumbai

June 2019 – July 2019

- Built new user facing modules for MVP product based on **Angular 7**
- Converting designs from and Solutions Architect into pixel-perfect responsive screens.
- Helped in fixing cross-browser inconsistencies in the interface using **BrowserStack**.

## PROJECTS

### **mongodb-aggregation-builder**

- MongoDB Aggregation Pipeline Builder NPM Library built using Typescript.

### **GraphQL Nodejs Backend Starter**

- A Typesafe NodeJS Backend Server Boilerplate/Starter Built using Typescript/MongoDB/GraphQL/Redis.

### **Blockly NPM Library**

- Customised Blockly React Wrapper around Google's official Blockly Library.

### **Flashify**

- Flashcard Mobile App Built using React Native.
